A1 1:250

Route through field to be agreed with land owner. Potential to combine route with substantial re-wilding to increase biodiversity

Carriageway narrowed to min. 6.0m to provide minimum 2.5m wide shared path on the north side of A378

New toucan crossing over the A378

Pedestrian gate introduced to maintain level access to PRoW

New double width farm gate introduced

Some carriageway widening into verge may be required

New 3.0m wide shared active travel path introduced along the field margin providing a new link between Currywoods Way and Sandpits Lane, with a bound surface enabling all-weather and inclusive use. Path separated from field by stock fencing

New 30mph speed limit gateway feature

Existing footway widened to allow use as shared path to provide a connection with the proposed new crossing. Carriageway narrowed to min. 6.0m to provide minimum 2.5m wide shared path.

Stile retained

New double width farm gate introduced

Gypsy Drove likely to require full depth carriageway construction to accommodate heavy agricultural vehicles and active travel uses

New 3.0m wide shared active travel path introduced along the field margin providing a new link between the A378 and the eastern end of Park Lane, with a bound surface enabling all-weather and inclusive use. Path separated from field by stock fencing

Surfacing constructed to accommodate heavy agricultural vehicles on approaches to farm gates

Existing field entrance width unchanged

Path follows Park Lane, length of Park Lane to be repaired / resurfaced as required to accommodate residential and agricultural vehicle access

New 3.0m wide shared active travel path introduced along the field margin providing a new link between the A378 and the eastern end of Park Lane, with a bound surface enabling all-weather and inclusive use. Path separated from field by stock fencing

Path rejoins Park Lane, length of Park Lane to be repaired / resurfaced as required

New double width farm gate introduced

Path crosses Park Lane, section of Park Lane to be repaired / resurfaced as required

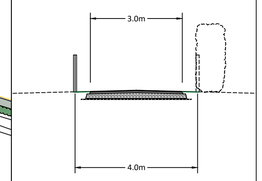
New double width farm gate introduced

Path shown with stock fencing either side, potential to introduce a hedgerow and/or tree planting along northern side of path to increase screening from adjacent property

Opportunity to introduce future active travel connection to Drayton along route of existing PRoW subject to land owner agreement

NOTES

These drawings have been produced with reference to the CDM Regulations 2015. Please note that these are pre-construction phase drawings and should be subject to further design risk management as required in accordance with Regulation 9



Typical cross section of new active travel paths

- Minimum path width 3.0m within a minimum 4.0m wide corridor
- 0.5m wide green verge either side of path
- Stock fence or hedging along edges of corridor
- 2.5% cross fall or camber to drain to the edges
- 20mm surface course
- 60mm binder course
- Min. 150mm sub-base course
- geotextile below subject to ground conditions

Existing Public Right of Way (PRoW)

New active travel path or footway widening

New carriageway construction to accommodate active travel and agricultural vehicles

Existing road or track requiring repair and/or resurfacing

Buff anti-skid surface dressing or imprint asphalt in carriageway to highlight area/feature

Significant existing hedge retained and managed along existing path edge

New or enlarged verge / landscaped area
